

NOISE LEVEL MEASURE SHOW SYSTEM

level's video frames. Software shows animated video depending on the noise level. Noise records can be fixated and showed on the video cube. And people like it

Arena is overcrowded! The game is beautiful and strained. Do you want people to fall into ecstasy? You don't need "ecstasy", only let people to make noise as much as they can and allow them to see noise level on the arena video cube!

Noise level measuring and showing system includes microphone, connected to the computer with graphic board and special software. Noise measure computer is operating as a source for the arena video switcher. It is possible to use computer's TV out (no need for additional graphic board) if quality of this output is acceptable. Noise level graphic is generated as

so much! Microphone is connected directly to the computer's audio input.

External audio mixer can also be used. It is available to adjust noise level by the software. But there is no need to indicate absolutely accurate measurements. It is only a show!
