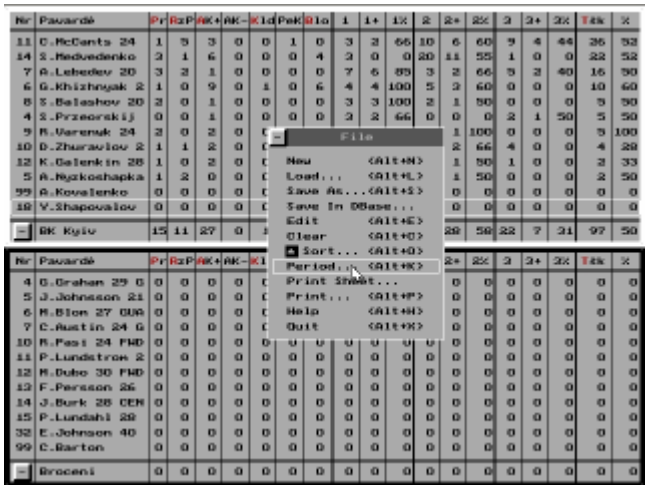
SPORT GAMES STATISTIC SOFTWARE

The purpose of sport games statistic software is statistic information gathering. Why do not use secretoriat info as a source? Live TV broadcasting requires extremely quick statistic info preparation and updating (especially in basketball). And need to mention, that secretoriat staff are not TV people! It is very important to be independent during live broadcasting events. Statistic computer is usually located in a sports arena in such a place which provides the best view point. Softwares are adapted for each game to reach maximum speed. At the moment there is software dedicated for basketball, football and handball. All functions has a short key



combinations. Software offers useful functions to sort out the lists by different parameters. All information is saved into database file after any changes. Statistic computer is connected to a network together with graphic computer. Software provides special functions, like 90 min clock and additional time clock for football. Counter of the ball controling time for each team is available as well for football and handball.

Technical specifications:

Operating system:	Windows 7, Windows XP
